Sage Payroll Software

Prices valid from 01 October 2021 to 30 September 2022

Integrated Sage Payroll software

Ensures salary get paid on time, every time

10 Reasons why you should use Netcash to pay your employees:

1. **Save time** by using ID validation that highlights incorrect ID numbers upfront. No need to check details outside of the payroll software.

2. Bank account validation means **no more unnecessary last minute rejects** when processing payments. You have the peace of mind that all payments will be accepted by the banks on payday.

3. **Bulk validation and verifications** will save you time by checking your entire payroll, so you don't have to do individual checks.

4. Bank account verification compares the bank account to your employee's ID number, so you **pay the right employee every time.**

5. **Manage your risk** and avoid internal fraud by checking the credit status of potential employees and those in positions where managing money is key to their role.

6. Seamless file uploads to Netcash means **no more emailing payment files**. Email is often unsafe, unreliable, and exposed on the computer desktop.

7. **Minimise human error** and have the comfort that payment details can't be edited once the payments have been sent to Netcash.

8. Our Dated payment service ensures that all **employees receive payment at the same time.**

9. Authorise your Netcash salary and third party payments from **within your software.**

10. We offer competitive transaction and monthly service fees, which will **reduce bank charges.**

Fee type	Cost
Monthly fee (Includes Salary and Creditor payments)	R50.00
